HELLO AND WELCOME
TO THE 2025 SPECIALTY TAG & LABEL CATALOG!

We at Specialty Tag & Label, Inc. are proud of our dedicated team of passionate individuals who are wholeheartedly committed to serving our customers. Since 1997, we have focused on delivering solutions, not excuses, because your satisfaction is our utmost priority.

What have we done to improve our service?
1) Expanded warehousing to accommodate 17,000 square feet of product in Ocala FL & Flowery Branch GA to continue our traditional same-day shipping
2) Additional Technical Expert Support personnel hiring
3) Additional Exclusive products like ¾ x 4 ½ pot stakes for 4" printers
4) Addition of Spanish speaking customer service
5) Expanded printer line to include a desktop .23 mil pot stake printer

At Specialty Tag & Label Inc., our commitment is to deliver top-quality products at competitive prices, complemented by the industry's highest level of service. This goal remains at the heart of our operation.
Your Specialty Tag & Label Team

SATO

Meeting Demands

TXPEX6 Thermal Printer

The TXPEX6 is the latest addition to SATO's Horticulture printer line. Designed for the most demanding printing applications, the TXPEX6 easily handles material thicknesses up to 24 mil at speeds up to 12 inches per second. The TXPEX6 is available with a 6-inch (305 dpi) print head and can print tag widths up to 10 inches ladder style (sideways). This print orientation promotes faster throughput and maximizes ribbon usage.

EX6 Printer Features

- The EX6 comes standard with USB 2.0, LAN 10/100 Base, IPv6 and USB Host/ RTC interfaces.
- Near-edge printhead for printing plastic
- RFID is an available option on page 12.

Specialty Tag & Label, Inc.
IDENTIFICATION SOLUTIONS FOR HORTICULTURE
Flowery Branch, GA
Ocala, FL
(800) 475-2040

SATO Horticultural RFID Solutions

RFID Tagging is an ID system that uses radio frequency for object identification and tracking purposes.
A radio frequency identification (RFID) system includes:
• An RFID tag – an antenna with an integrated circuit, IC for data storage and communication with the
   RFID reader.
• A read/write device
• A host application for data collection, storage, processing and or transmission.

RFID uses radio waves to automatically identify and track the tags containing electronically stored
information attached to plants or inserted into pots.
The SATO RFID solution allows growers to track and store data about their products. Fitting every shelf, row or plant with a RFID tag, growers will be able to monitor stages and progress of potentially every plant in a greenhouse.

Beyond the greenhouse, shipping containers with RFID identification will enable tracking, from the crop to the market.
In addition to tracking, a RFID system provides information such as place of origin or date of harvest.

LABEL DESIGN SOFTWARE

Selecting the correct software for your current set up is important, and we are here to help!

BarTender
BY SEAGULL SCIENTIFIC

Starter Workstation

No Trial Version available

$355.00

Tier 2
Tech Support:
800-758-2001

BarTender Starter Workstation is an easy entry level workstation solution that can simplify your printer management and user access.
- An easy-to-use and easy-to-learn intuitive interface for designing your labels with context-sensitive help
- Choose from over 100 1D and 2D symbologies based on over a dozen standards
- Connect to a CSV or EXCEL type database for easy-to-print formatted labels.
- Select among 50+ drawing shapes, and resize, reshape and color them in just about any way imaginable, or import your own graphics
- Support for human readable text for barcodes, including 2D symbologies
- Over 160 predefined label templates from common industries and use cases
- Predefined label sizes for Avery and over 20 other suppliers

NiceLabel

Designer Pro

30-Day Trial available

$595.00

Tier 2
Tech Support:
704-644-1660

Nice Label Designer Pro is tailored for small or medium-sized businesses with few users, few label variations or low volume printing requirements. Full database connectivity to almost any database like Access, SQL, etc.
- Multiple User Keyless Activation
- Certified and compatible systems: Vista/Windows 7/ Windows 8/Windows 8.1/ Windows 10 and 11
- Print Barcodes, QR Codes, Logos and more
- Connect to almost any database system
- Security features to lock a design with a password
- RFID Encoding

TAGGIT® PRO
A SATO brand

30-Day Trial available

$595.00

Tier 2
Tech Support:
704-644-1660

Taggit Pro 22 allows horticulture users to decrease time spent on label design and increase productivity with an easy to use interface, helpful wizards, and simplified database connections. Streamlined data entry allows you to design labels and print them in a much shorter period of time.
- Simplifies adding barcodes, images, text (including TrueType Fonts), and variables during label creation
- Quick and easy connection to, and creating queries from, a database
- Reduce errors at the time of print, using customizable forms
- Includes customizable plant database; use one of the 4,500 preloaded records (including Annuals, Perennials, Trees, and Broadleaf Shrubs) or add your own variety of information
- Support for Windows 11
- Printer Search feature for native printer models and previously added printers

What is a QR Code?

What is a QR Code? How do you scan it?

Basically, a QR code works in the same way as a barcode at the supermarket. It is a machine-scannable image that can instantly be read using a Smartphone camera. Every QR code consists of a number of black squares and dots which represent certain pieces of information.

How to scan a QR code with your iPhone, iPad, or iPod Touch:
1. Open the Camera app from the Home Screen, Control Center, or Lock Screen
2. Select the rear-facing camera. Hold your device so that the QR code appears in the viewfinder in the Camera app.
3. Tap the notification to open the link associated with the QR code.

How to scan a QR code on your Android Phone:
1. Press and hold the home button.
2. Tap the Lens
3. Point your camera at the QR code.
4. Tap the magnifying glass icon ot scan the QR code.
5. Tap the pop-up notification

All of our thermal and laser stock is

POT TAGS   page 18-19

Also referred to as "Pot Stakes" or "Stick Tags" these sturdy plastic tags stick right into the soil. Available in 4 different thermal printer compatible materials.

SLIP ON TAGS   page 20-21

Also referred to as "Wrap Around Tags" or "Strap Tags" these tags loop around a limb or a branch. Available with or without a tear off on the end. Available in vertical or horizontal feed.
### HANG TAGS   page 22-23

Also referred to as a "Basket Tag," these tags lock onto a hanging basket or limb. Available in the heavy plastic (PX) material or the flexible thermal (TX, TT) material.
PRESSURE SENSITIVE LABELS   page 24-25

Also referred to as "Stickers," these labels are perfect for trays and pots. Available in white or with big box retail borders. Clear and Block-out labels are available to complete your custom printed picture tags.
SIGNS   page 26

Perfect to identify sections, varieties, sales and more. Available blank, with headers or with classification. We have your signage needs covered.

We can add an RFID inlay to any Thermal Pot Tag in our catalog for an additional charge.

THC-iD Imperial Tags

Low Density Polyetholyne (10 Mil)
These tags are compatible with most states mandated seed to sale tracking software. These tags can be placed in the soil pierced through the punched holes at either end using a zip tie or a bamboo stick. Additionally, the tag can be affixed to the mature cannabis plant using a zip tie.
Item #	Description	Roll/Pk Qty	Case Qty	1 Case per M
